Ensure good ventilation, where necessary use fume hood.

Personal protection equipment**Eye/face protection**

safety goggles

Hand protection

The selection of the suitable gloves does not only depend on different material, but also on further marks of quality and varies from manufacturer to manufacturer.

The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed.

Since the product is a preparation of several substances, the resistance of glove materials is only conditionally predictable and must therefore be checked before use.

The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances.

Body protection:

Impermeable protective clothing
